

Cancer

MD Cause: Life, Genetics, Exposure to environmental toxins (nicotine, asbestos, pesticides, herbicides, etc.).

MD Rx: Burn it (Radiation), Dissolve it (Chemotherapy), Cut it (Surgery).

ND Cause: Severe emotional stress; Chronic, unrecognized nutrient deficiencies; Consistent consumption of cancer-causing foods; Exposure to environmental toxins (nicotine, asbestos, pesticides, herbicides, etc.).

Discussion: We have lost the war on cancer. While the MDs have been in exclusive control of medicine, cancer rates have risen and there are NO cures for cancer (with the exception of childhood leukemia). The graphs below (from the American Cancer Society) outline this failure starkly, but every year people donate millions of dollars to allopathic cancer research. No other industry can fail so miserably and still maintain their “Number-1” status.

My Rx: I have NO IDEA of what to do to treat cancer, but a few of my colleagues do. My first recommendation is to go here: [Nature Works Best Cancer Clinic, Tempe, Arizona](#). You should also research the story above regarding the Canadian cancer patient JOE TIPPENS. He cured himself from lung cancer which had spread throughout his body by taking a de-worming med for dogs...

Click any graph below to enlarge it.

The charts below reflect the effectiveness (or in this case - the lack thereof) of conventional cancer treatments. The numbers inside the Green bars represent the Percentages of patients who are still alive. The American Cancer Society didn't want to extend the graphs out longer than 5 years because of obvious reasons...
