TOP Services w/ Descriptions

142.65 **Reflexology**

Reflexology is a therapy in which a practitioner applies physical pressure to the feet, hands, or ears with specific thumb, finger and hand techniques. The practitioners focuses on certain zones or reflex areas that are believed to reflect another area in the body. By working on these zones, reflexology can bring about improvements in health in other areas in the body.

119.17 **Prolozone Therapy**

Prolozone Therapy is a treatment for joint, shoulder, elbow, back or neck pain. It can also treat degenerative and arthritic hips, knees and degenerated discs. Prolozone Therapy is an oxygen-ozone injection technique which promotes creation of collagen and other substances in the body which help damaged ligaments reconstruct and heal. It is considered a non-surgical and homeopathic treatment to permanently reverse chronic pain.

112.61 **Poly-MVA**

Poly-MVA is a uniquely-formulated combination of minerals, vitamins and amino acids designed to support cellular energy production and promote overall health. Poly-MVA also replaces specific nutrients that may be depleted during certain therapies. A patented dietary supplement with over 18 years of clinical and laboratory research and testing, Poly-MVA is a revolutionary product and the first in a remarkable new category of supplements called lipoic acid palladium complexes (LAPd). Definitive human studies continue and support what previous and ongoing case studies indicate - that the Poly-MVA complex is beneficial in promoting optimum health, protecting cell DNA and RNA, and assisting the body to produce energy to function properly. The product is a unique complex with powerful antioxidant properties which can help to neutralize the free radicals within the body and convert them into a usable energy source for our cells.

103.94 **Functional Medicine**

Functional medicine addresses the underlying causes of disease using a systems-oriented approach and engaging both patient and practitioner in a therapeutic partnership. It is an evolution in the practice of medicine that better addresses the healthcare needs of the 21st century. By shifting the traditional disease-centered focus of medical practice to a more patient-centered approach, functional medicine addresses the whole person and not just an isolated set of symptoms.

103.42 **PEMF - iMRS2000**

The iMRS (stands for Intelligent Magnetic Resonance Stimulation) is the world leader in pulsed magnetic therapy using exclusively earth based Schumann Frequencies, intensities and has a built-in intelligent biorhythm clock. It is the world's most used PEMF device with over 16 years of research and experience. It also uses the proven square wave, which has been shown to be the most effective for healing and regeneration.
