### 79.03 **Color Therapy**

Color therapy, also known as chromotherapy, is often facilitated in the healing rooms of alternative health practitioners. ### 78.57 **Castor Oil Packs**

A castor oil pack is an external application of castor oil to the body. A piece of wool (or cotton) flannel is saturated with castor oil and applied to a specified area, with or without heat. Castor oil packs can be used to improve assimilations, eliminations, and circulation (especially of the lymphatic system) and are particularly helpful in aiding the breakup of adhesions of the lacteal glands.

### 77.65 **Iridology**

Iridology (also known as iridodiagnosis or iridiagnosis) is an alternative medicine technique whose proponents claim that patterns, colors, and other characteristics of the iris can be examined to determine information about a patient's systemic health. Practitioners match their observations to iris charts, which divide the iris into zones that correspond to specific parts of the human body. Iridologists see the eyes as "windows" into the body's state of health.
